Report on Webinar

“Workplace Awareness – Culture, Gender & Personality”

Department of Science and Humanities organized webinar titled “Workplace Awareness – Culture, Gender & Personality” on 5th June 2020. Dr.P.Lalitha, Professor of English JBAS College for Women, Chennai was the resource person. The resource person in her opening remarks, observed that in the globalized business scenario, social issues like gender equality, child labour, decent working conditions and environmental concerns etc. now feature prominently in corporate plans and policies. She also highlighted a series of activities were conducted which aimed at promoting gender awareness and equal opportunity policies at the enterprise level. These included recruitment, promotion and involvement of women in decision making process which should be purely based on talent, skill development without discrimination. The concept of gender is created culturally in families and societies and it is not predetermined. It is changeable in terms of time, place and culture and also varies widely within and across cultures and places. At last she added that “Inequality will affect those who have less power to a greater degree”. Around 130 participants have attended & also interacted with the guest enthusiastically on gender equality.

Webinar

“Effective Communication for Enhancing Teaching Learning Process”

Department of Science and Humanities organized webinar titled “Effective Communication for Enhancing teaching learning process” on 20.06.20 & 21.06.20.JFF. Rajeswari Venkataraman National Trainer, NLP Practitioner, JCI Salem was the Resource Person. The resource person initially mentioned that the success of the teaching-learning process depends on the teacher’s knowledge and the teacher’s ability to transfer the same to the students. Communication plays a vital role in the transfer of knowledge to take place. Furthermore, she also added the process is facilitated by the verbal communication that not only helps in the sharing of the knowledge but also creates an amicable environment to facilitate the sharing of ideas/opinions/feelings between the teacher and the students. Communication skills play a crucial role in the teaching learning process. The communication skills of the teachers need to be reinforced in the teacher training programmes for facilitating the fluent transmission of the knowledge. She finally encouraged the participants to emphasize on Verbal communication to make teaching learning process more interactive, empathetic and fun filled.

SPELL BEE

Learning a language is the foremost step in the life of a student as it helps him/her to communicate with the world. Department of Science and humanities in join hands with EC Club organized "Spell Bee Competition" virtually on 12th May 2021 for the Students of Higher Secondary. Pro Chairman Mrs.Aishwarya Nitish & Principal Dr.V.Munusami presided over the contest. Mrs.M.Dugapriya, Professor in English acted as a quiz master. Principal Dr.V.Munusami delivered the welcome note & Pro Chairman , Mrs.Aishwarya Nitish delivered the key note address. The Contest aimed at creating awareness of the possibilities of using correct pronunciation & spelling. The competition comprised of 4 rounds like saying spelling, pronunciation, framing sentences and expanding their vocabulary to improve their communication and comprehension skills. A thorough orientation was done by the English teachers before the event in the format of the competition. This language development program comprises learning through play way method and a healthy competition is thus encouraged. It is also an endeavor to keep pace with technology the demand of new age .Teachers facilitated the smooth organization and execution of the event. Summing up, the competition helped the students to familiarize with the spellings and usage of many unfamiliar words.

Finally Pro Chairman, Mrs.Aishwarya Nitish appreciated the students for their active participation and also announced the winner of 'Spell BEE Contest'21 as Bakiyasri from SRV Hi tech Girls, Rasipuram . The contest ended with the students' feedback on Spell BEE'21.

“Intercollegiate Spell Bee Competition”

Language plays an important role in all round development of a student. Appropriate words with correct spelling conveys right message. “Spelling is important because it aids in reading. It helps cement the connection that is shared between sounds and letters”. Department of Science and humanities in join hands with EC Club organized an Intercollegiate “Spell Bee Competition” virtually on 21th May 2021. Mrs.M.Dugapriya, Professor in English acted as a quiz master. Principal, Dr.V.Munusami delivered the welcome note & Pro Chairman, Mrs.Aishwarya Nitish delivered the key note address. The objective of the competition was to enhance the spelling and literary skills of the students by encouraging them to explore the English language,. This helps students to improve spelling, vocabulary, learning concepts and pronunciation. The Contest aimed at creating awareness of the possibilities of using correct pronunciation & spelling. The competition comprised of 4 rounds like saying spelling, pronunciation to improve their communication and comprehension skills. A thorough orientation was done by the English teachers before the event in the format of the competition. This language development program comprises learning through play way method and a healthy competition is thus encouraged. It is also an endeavor to keep pace with technology the demand of new age .Teachers facilitated the smooth organization and execution of the event. Summing up, the competition helped the students to familiarize with the spellings and usage of many unfamiliar words. Finally Pro Chairman, Mrs.Aishwarya Nitish appreciated the students for their active participation and also announced the winner of Spell BEE Contest'21 at college level as Roshan from KSR Engineering College, Tiruchencode.

The contest ended with the students' feedback on Spell BEE'21. This competition was successfully conducted under the support and guidance of Pro Chairman Mrs.Aishwarya Nitish and Principal, Dr.V.Munusami.

“English Proficiency Opens New Career Opportunities”

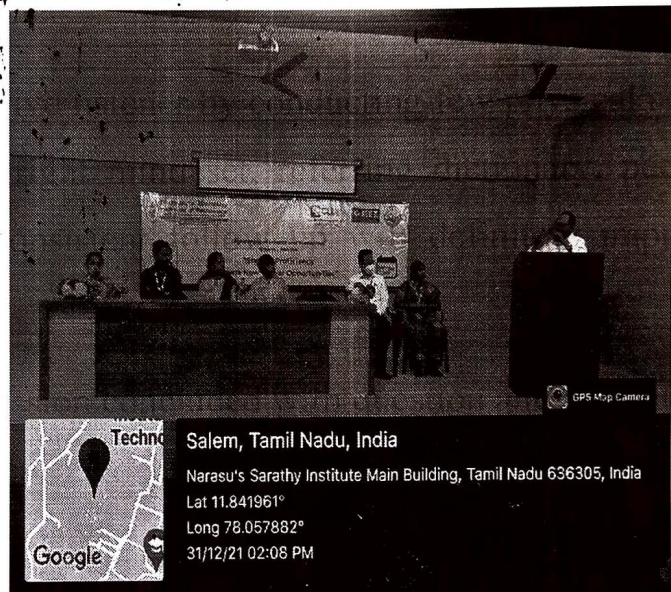

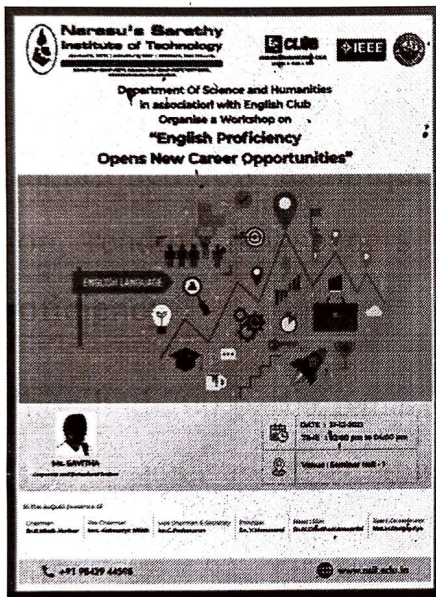

Department of Science and Humanities in join hands with EC Club has organized a workshop titled “English Proficiency Opens New Career Opportunities” exclusively for I year students on 31.12.21. Ms.Savitha Corporate & Behavioral Trainer was the ResourcePerson. Thiru.G.Prabakaran, Vice Chairman & Secretary, Principal Dr.V.Munusami, Special invitee Mrs.FranswaVeron and Dr.M.Gowdhamamoorthi, HoD, Science and Humanities graced the occasion. Mrs.M.Duragapriya, Associate Professor of English coordinated the workshop.

Our Principal Dr.V.Munusami, delivered the welcome address and wished the students to make the effective use of the workshop to enhance the Language proficiency. Thiru.G.Prabakaran, Vice Chairman & Secretary delivered the keynote address. In his address, he mentioned that Language is the foremost primary tool to exchange thoughts among different persons, different linguistic groups or different countries around the world. He also rightly pointed out and encouraged the students to get proficient in the global language as it will open the doors of many lucrative career opportunities around the world.

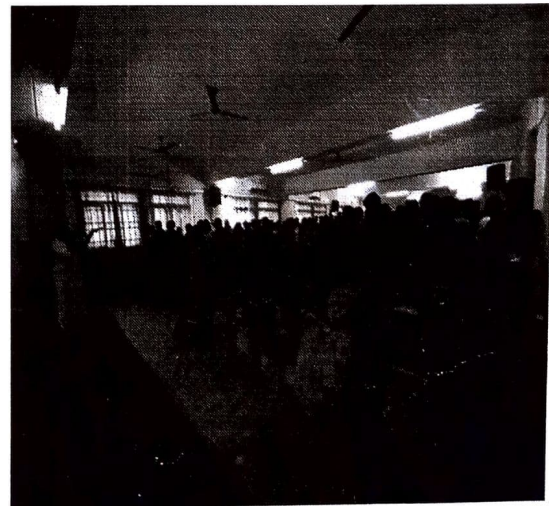

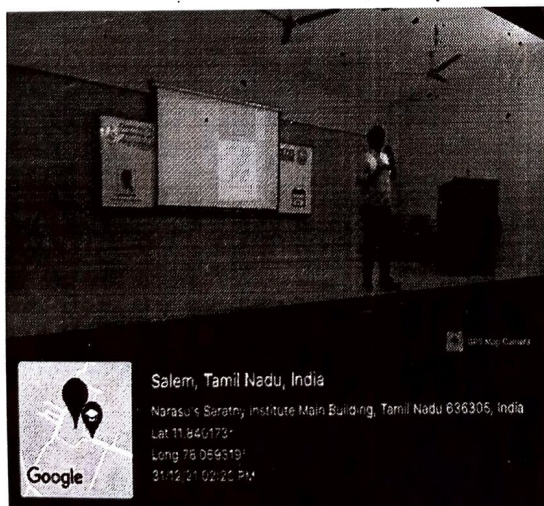

The Resource Person Ms.Savitha, Corporate & Behavioral Trainer initiated the session with a recapitulation of concepts on the nature of language and language acquisition. The speaker mentioned that how the enhanced communication skills in English can result not only an improved social life, but also better job opportunities in the future. She also encouraged the students to have a very good grasp of the English language in order to have an increased competence in the professional world. Following that Mrs.Franswa Veron,

Corporate trainer, made the students an active listener by conducting few physical activities. She also mentioned few techniques like right mind set, referring dictionary, peer group conversation, reading newspapers with consistent follow up will definitely improve the English proficiency.

The workshop had 200 participants. The session concluded with question and answer session in which the speaker clarified the queries put forth by the participants. Finally, I year Computer Science Engineering student M.Anandkumar delivered the vote of thanks.

“Online Language Tools for Self Learning”

The Department of Science and Humanities in join hands with EC Club has organized a online Workshop titled “Online Language tools for self learning” on 23.04.21. Dr.A.A.Jayashree Prabhakar Professor Department of English Vels Institute of Science Technology and Advanced Studies Chennai was the Resource Person. The workshop aims to help students to develop the language skills using the Online tools during this pandemic situation. It also explains how to communicate, collaborate, organize and manage assignments, go paperless, and much more! Dr.A.A.Jayashree Prabhakar explained how Online lecture, videos, or screen casts created by an instructor can have a positive impact on students’ attitudes towards their learning experience. Students may believe that they comprehend the content better and also believe they can work at their own pace. She also mentioned useful websites like Dulingo, Flo –Joe, BBC Learning English, TED, Talk English to enhance the language skills.

AS
230424

Finally she motivated & encouraged the students to create interest of their own in learning language through online. Around 150 students have actively participated and got benefitted from the workshop.

To

Mr. N. Manikandan, Ms. R. Akila Kumaresan & Ms. Savitha Kannan,
ISHA yoga Volunteers,
ISHA Yoga Centre,
Salem.

Respected Sir,

Warm greetings from Narasu's Sarathy Institute of Technology, Salem

We deeply appreciate the YOGA Program titled "SURIYASAKTHI YOGA" you delivered for our I year students on 30.12.2021. It was really a motivating session for our students to develop concentration, to practice exercise, and to make mentally and physically fit. Thanks for spending your valuable time for our students betterment. Expecting for favourable support in the forthcoming years.

A REPORT ON SURIYASAKTHI YOGA

Title: SURIYASAKTHI YOGA
Participants: 1st year students
Date: 30.12.2021
Time: 11.00AM-12.15PM (Batch-1) & 3.00PM-4.15PM (Batch -2)
Resource Person: Mr. N. Manikandan, Ms. R. Akila Kumaresan & Ms. Savitha Kannan,
ISHA yoga Volunteers, ISHA Yoga Centre, Salem.
Event Co-ordinator: Ms. V. Suganya, AP/ Mathematics

NSIT organized “SURIYASAKTHI YOGA” program for 1st year students on 30.12.2021. The Resource persons were Mr. N. Manikandan, Ms. R. Akila Kumaresan & Ms. Savitha Kannan, ISHA yoga Volunteers, ISHA Yoga Centre, Salem. Dr. V. Munusami, Principal delivered the welcome note and initiated the YOGA session.

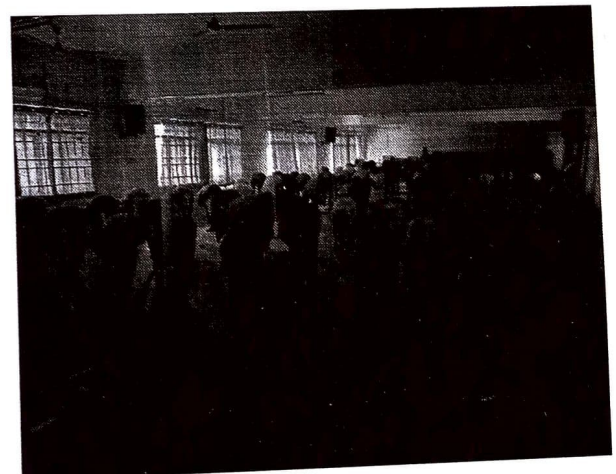

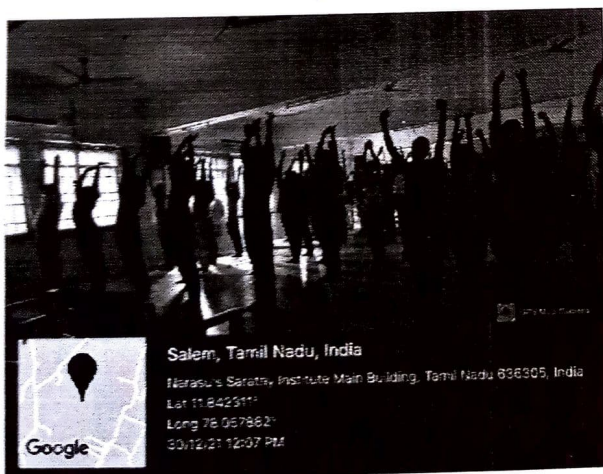

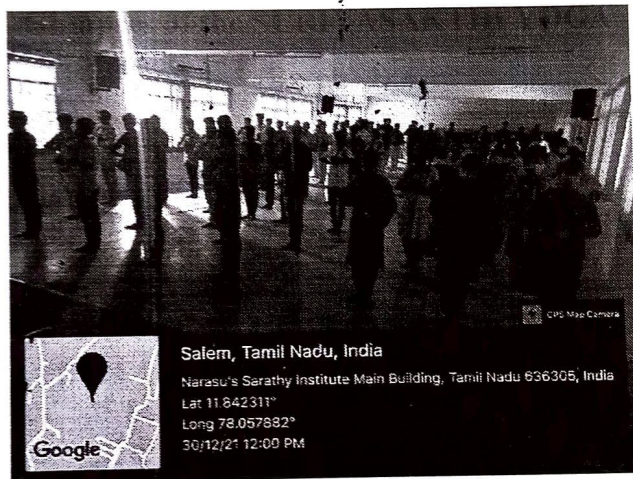

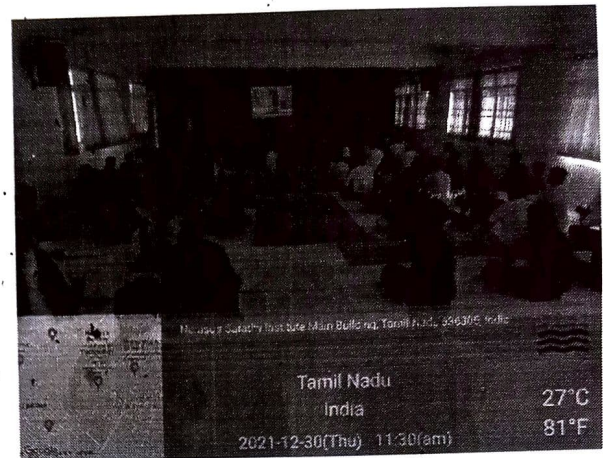

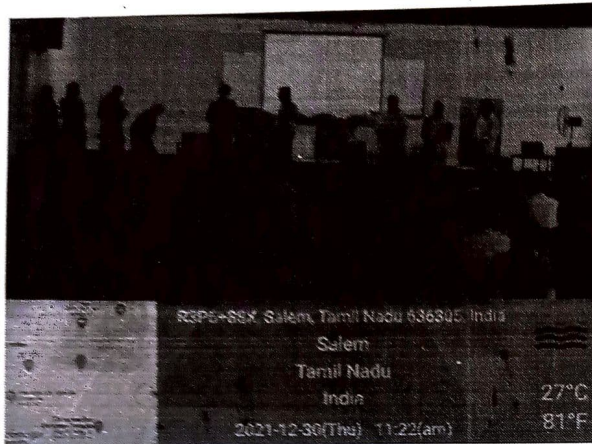

Our students were encouraged to practice yoga and to do meditation, as it will help them combat with different types of stress. The practice of Yoga stimulates the process of unity of mind, body and soul. Yoga is useful in maintaining physical and mental energy and meditation leads to spiritual peace.

Yoga has helped the students in many aspects and visible changes in their behavior and attitude have been observed. Yoga helps them in being disciplined and physically fit. Apart from regular in-house classes, external yoga trainers are invited every year to train our students.

Meditation gives students a peaceful mind to think, be creative and productive. Yoga practice aids in having a balanced lifestyle with the ability to manage stress caused due to many factors. It has been noticed that yoga practice has improved positivity and nurtured healthy habits among the students. Dr. M. Gowdhamamoorthi, Head of the Department, Department of Science and Humanities delivered the Vote of thanks. Around 180 students have attended the session in two batches and got benefitted.

REPORT

A one day webinar was organized on “**Recent innovation in Biomedical Engineering**” by the Department of Electrical and Electronics Engineering in association with Institution’s Innovation Council on 31st May 2020. Dr.C.Ramkumar, Associate Professor, Department of Biomedical Engineering, Dr.N.G.P College of Technology, Coimbatore was invited as the resource person for this session. The resource person gave a brief introduction that Continuous technological innovations are bringing new opportunities to healthcare applications. Although these improvements apply to most of its different fields, outstanding results are being achieved in medical devices interoperability, oriented to common solutions including wearable devices, focused to the new paradigm of Personal Health. He also said that these evolutions can improve the quality of the patient's care, increase the user's interaction and, furthermore, lead to new medical use cases based on Ambient Assisted Living(AAL), home monitoring of elderly, heart failure, chronic, under palliative care or patients who have undergone surgery, urgencies and emergencies, or even fitness auto-control and health follow-up. Furthermore, in order to assure p-Health applications to be fully compatible with larger global e-Health systems in terms of terminology homogenization or plug-and-play operation, proposed solutions have to be based on interoperability. Finally, he said that recent innovative advances in biomedical engineering are applied to standard-based telemedicine solutions

CLIP OF THE MOMENT:

PRINTING HUMAN ORGANS WITH BIOMATERIALS

- Three-dimensional printing is most commonly known for expediting prototyping processes in manufacturing.
- Using computer-aided design software (CAD), engineers or designers create digital models of the product
- speed, precision, and possibility demonstrated by 3D printing has not escaped the notice of the regenerative medicine branch of bioengineering. Bioprinting, an emerging technology for creating living tissue and organs in the lab,
- similarities between 3D manufacturing and 3D bioprinting, printing organs that function in the human body requires knowledge and technology extending far beyond the typical 3D printing process.
- Instead of plastics, the material used for bioprinting is known as bioink—a complex mixture of natural polymers, synthetic polymers, and human cells
- Biomedical engineers are already beginning to overcome some challenges, bringing us closer to being able to recreate organs using 3D printing technology

REPORT

Title of the Event: Enhancing Coding skills Using Python

The Event started with the Welcome Address delivered by our Respected Principal Dr.Munusami Viswanathan, followed by Dr.M.Rameshkumar, Head/CSE has given the introduction about Guest Mr.J.Asaithambi, Founder & Director, AARON Technologies, Chennai.

ENHANCING CODING SKILLS USING PYTHON

Presented By,
Mr.J.Asaithambi,
Founder & Director,
AARON Technologies , Chennai

Figure: 1 Mr.J.Asaithambi (Founder & Director)/AARON Technologies, has shared his valuable ideas about 'Python Concepts'

With Education and Ethics, we create Excellence

What is Python...?

- Python is a general purpose programming language that is often applied in scripting roles.
- So, Python is programming language as well as scripting language.
- Python is also called as Interpreted language

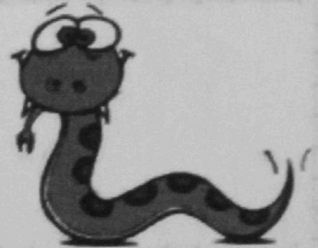

Figure: 2 Mr.J.Aasaithambi (Founder & Director) /AARON Technologies, has shared concepts of Python

With Education and Ethics, we create Excellence

Differences between program and scripting language

Program

- a **program is executed** (i.e. the source is first compiled, and the result of that compilation is expected)
- A "program" in general, is a **sequence of instructions written so that a computer can perform certain task.**

Scripting

- a **script is interpreted**
- A "script" is code written in a scripting language. A scripting language is nothing but a **type of programming language in which we can write code to control another software application.**

Figure: 3 Mr.J.Aasaithambi (Founder & Director) /AARON Technologies, has explained the difference of Program and Scripting Language.

- A scripting language or script language is a programming language for a runtime system that automates the execution of tasks that would otherwise be performed individually by a human operator.
- A programming language is any set of rules that converts strings, or graphical program elements in the case of visual programming language, to various kinds of machine code output.

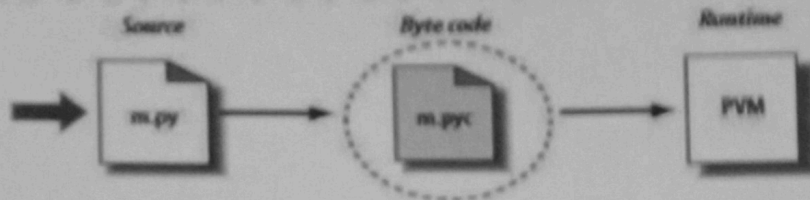

Installing Python

- Python is pre-installed on most Unix systems, including Linux and MAC OS X
- But for in Windows Operating Systems , user can download from the <https://www.python.org/downloads/>
 - from the above link download latest version of python IDE and install, recent version is 3.4.1 but most of them uses version 2.7.7 only

Figure: 4 Mr.J.Aasaithambi (Founder & Director) /AARON Technologies, has explained the Installation of Python.

Python Code Execution

- Python's traditional runtime execution model: source code you type is translated to byte code, which is then run by the Python Virtual Machine. Your code is automatically compiled, but then it is interpreted.

Source code extension is **.py**
Byte code extension is **.pyc** (compiled python code)

17

Figure: 5 Mr.J.Asaithambi (Founder & Director) /AARON Technologies, has explained the execution of Python Code.

Math

Try typing this into Code:

```
>>> print 3 + 12
15
>>> print 12 - 3
9
>>> print 9 + 5 - 15 + 12
11
```

Operators:

add: +

subtract: -

Note: don't type the arrows >>> !

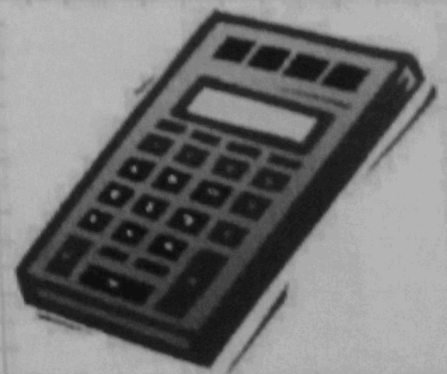

Figure: 6 Mr.J.Asaithambi (Founder & Director) /AARON Technologies, has explained the Math Functions.

With Education and Ethics, we create Excellence

Variable

Create a Variable:

```
>>>headmaster="Dumbledore"  
>>>print headmaster  
'Dumbledore'
```

Assigning a New Value:

```
>>>headmaster="Hardcastle"  
>>>print headmaster  
'Hardcastle'
```

Figure: 7 Mr.J.Aasaithambi (Founder & Director) /AARON Technologies, has explained the working concept of variable.

Data Type:

Python has many native data types. Here are the important ones:

Booleans are either True or False.

Numbers can be integers (1 and 2), floats (1.1 and 1.2), fractions (1/2 and 2/3), or even complex numbers.

Strings are sequences of Unicode characters, e.g. an HTML document.

Bytes and byte arrays, e.g. a JPEG image file.

Lists are ordered sequences of values.

Tuples are ordered, immutable sequences of values.

Sets are unordered bags of values.

Figure: 8 Mr.J.Aasaithambi (Founder & Director) /AARON Technologies, has described the Datatype of Python..

Statement	Description
<u>if statements</u>	An if statement consists of a boolean expression followed by one or more statements.
<u>if...else statements</u>	An if statement can be followed by an optional else statement , which executes when the boolean expression is FALSE .
<u>nested if statements</u>	You can use one if or else if statement inside another if or else if statement(s).

Figure: 9 Mr.J.Aasaithambi (Founder & Director) /AARON Technologies, has described the Datatype of Python

Loop Type	Description
<u>while loop</u>	Repeats a statement or group of statements while a given condition is TRUE . It tests the condition before executing the loop body.
<u>for loop</u>	Executes a sequence of statements multiple times and abbreviates the code that manages the loop variable.
<u>nested loops</u>	You can use one or more loop inside any another while , for or do..while loop.

Figure: 9 Mr.J.Aasaithambi (Founder & Director) /AARON Technologies, has explained the types of Looping Concepts.

Figure: 10 Vote of Thanks

The event culminated with a Q/A session, where the Speaker cleared the doubts of students. The session was very useful for our students and they gain knowledge about that contents. The Vote of thanks was delivered by the event co-ordinator Mr.M.Prakash Kumar, AP/CSE and Mr.Loknath Mishra (Student/CSE).

LETTER OF APPRECIATION

Dear,

Mr.J.Aasaithambi,

Founder & Director,

AARON Technologies,

Chennai.

On behalf of Narasu's Sarathy Institute of Technology and Department of Computer Science and Engineering, We are very much thankful to you for extending your full co-operation and sparing your valuable time for a webinar on the topic "Enhancing Coding Skills Using Python" held on 03/08/2020 for the students of CSE & IT.

It was really a fabulous presentation which exposed students to the field practices. All the students appreciated and got benefited from your views on the subject.

Looking forward for your cooperation for the promotion of professional education in future as well.

With regards,

REPORT

A one day national level webinar was organized by the Department of Electrical and Electronics Engineering in association with the Institution's Innovation Council on **“Renewable Energy Then, Now and Tomorrow”** on 25th August 2020. Mr. Arthanareeswaran Mayilsamy, Senior Project Engineer, UL India Private Limited, Bengaluru was invited as the guest of honor for this session. The resource person stated that in 2018, more than a quarter of the world's energy was generated from some of the renewable energy sources. Resource person explained importance of conventional and Non conventional energy sources and mainly focus of limitation non renewable energy sources, and he is delivered why switch over to non renewable to renewable sources, than he is describe the global warming and its effects of environment and society. The major renewable energy sources are solar, wind, etc.,. Around the world, governments are tapping into renewable sources to fuel the growing demand for energy. This conversation steers away from the costs of clean energy to the best practices

REPORT

A one day webinar was organized on the title “**Industrial Internet of Things**” by the Department of Electrical and Electronics Engineering on 11th August 2020. Mrs.M.Vimala, Senior Embedded Engineer from Becore Industries was invited as the chief guest of the webinar. The chief guest of the session started her speech that industrial internet of things is evolved from Industry 4.0. While the IIoT does fall under the internet of things are of influence, the key difference is IIOT concentrates on the connection of machines and devices in industries like manufacturing, healthcare and logistics. IIoT is about getting information that every single consumer need in their hands when they want it. She also added that IIoT is all about the interconnected instruments, sensors and many other devices that are networked together and communicating with computer driven industrial applications for many manufacturing and energy management areas of business. She also said that IIOT is an evolution of a control system which allows a significant improvement in automation by using cloud computing to enhance and optimize process controls. She also explained that IIoT mainly depends on key technologies like artificial intelligence, cyber-security, cloud computing, edge computing and data mining. She added that though IIoT has some disadvantages in installation cost wise. It also has bright side in manufacturing, pharmaceuticals, agriculture, mining, oil and gas, and retail are gaining ground and many companies are embracing this new paradigm for solutions in optimizing operations and personnel productivity. Students and faculty members participated and get benefited by this session

Respected Sir,

Our Department of Civil Engineering eager to conduct a Webinar on the title of **"Steel Structures Detailing using Tekla"** on 19th September, 2020. This webinar conducted to enrich our student's knowledge in practical concepts. Here we enclosed the budget proposal for your kind perusal. Hence, I kindly request you to consider the same and provide the permission.

Thank You

Yours faithfully,

Encl:

WEBINAR REPORT

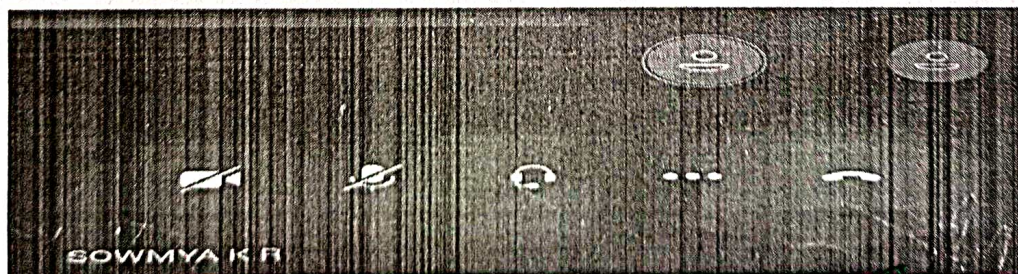

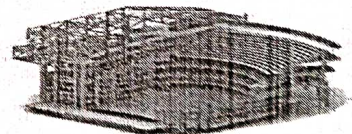

DATE	19.09.2020
TIME	11.10 AM to 12:30 PM
TITLE OF EVENT	STEEL STRUCTURE DETAILING USING TEKLA
TOTAL PARTICIPANT	31
RESOURCE PERSON	Er.K.R. Sowmya (Sr. Application Engineer) Institute of Industrial Design, Chennai

Webinar on Steel Structure was conducted through online mode on 22.09.2020, by Department of Civil Engineering. The resource person Er.K.R. Sowmya , Senior Application Engineer, Institute of Industrial Design, Chennai. The scope of the webinar is to give brief description about steel structural elements. The topics covered by the resource person was modelling steel parts, connections in steel model, numbering in steel model, detailing sheets preparation, generating drawings, reports and its templates, concrete modelling using TEKLA software. The software enables users to create and manage 3D structural models in steel and guides them through the process from concept to fabrication. TEKLA software is mostly used to model stadiums, offshore structures, plants, factories, residential buildings, bridges and skyscrapers.

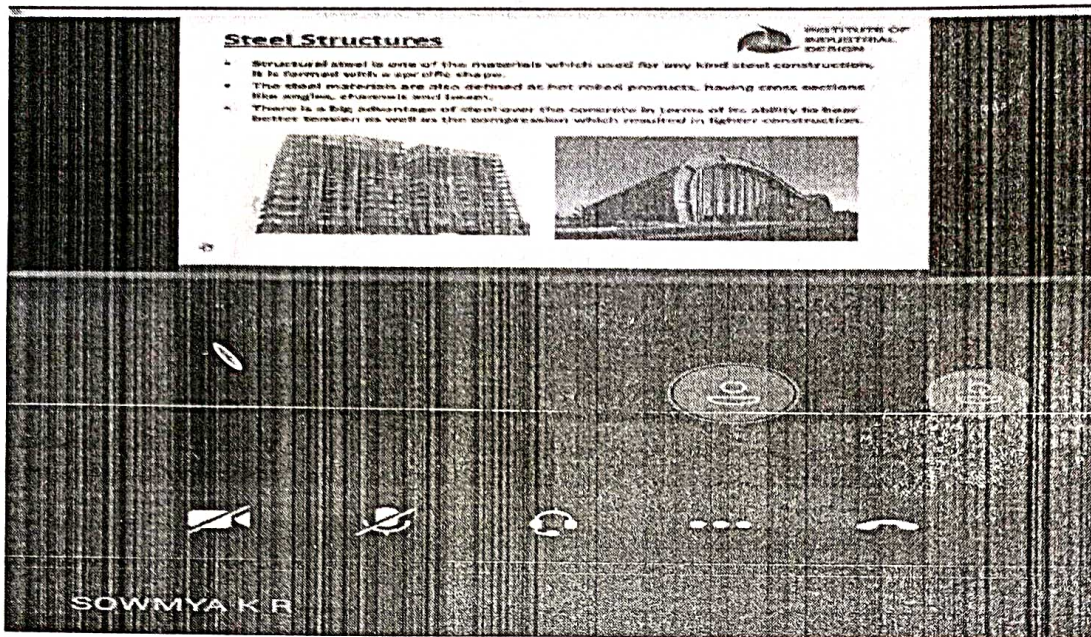

About Tekla Structures

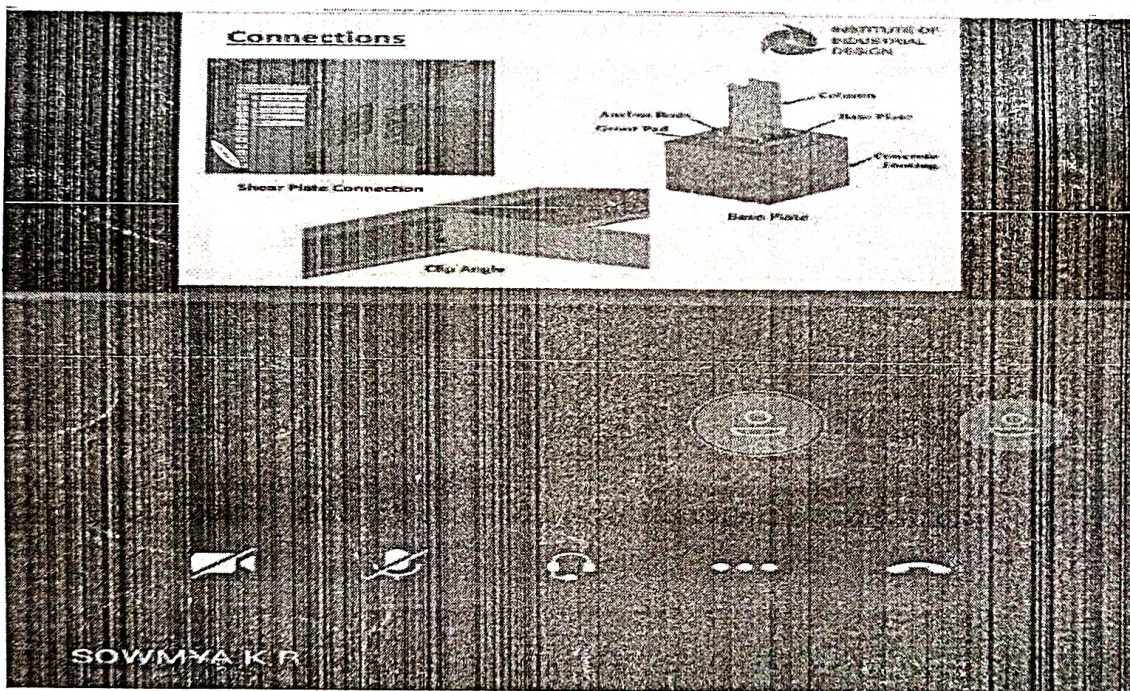

- Tekla structures is a steel detailing software.
- Basic concept involved in BIM (Building Information Modeling).
- Tekla Structures is used from conceptual planning to fabrication, construction and maintenance, detailing.
